Gaining Levels

- The new hit point total is calculated by rolling the dice indicated on the character progress table. Add any species / class hit point bonuses to the dice total. Add the constitution bonus times the new level for the grand total of hit points. If the newly calculated hit points total is higher than the character's current number of hit points, that becomes the character's new hit points. If the new hit point total is lower or equal to the old hit point total, add one to the old hit point value for the new total.
- The death limit is increased.
- Weapons attack dice are adjusted. Attack bonus = class bonus + species bonus + dex bonus.
