Paladin Class Progress

Paladins can use any armor and any weapon. Paladins have Spiritual Protection, which means that for each point of charisma bonus they gain 1 point of damage reduction per hit received. The damage cannot be reduced to less than 1. All hits do at least 1 point of damage.

Twice per dungeon run a paladin can use a special ability called “lay of hands”. Lay of hands heals any person that the paladin touches. The amount of healing is the paladin's level times the paladin’s charisma bonus. During a combat round, lay of hands can be performed by the paladin instead of attacking (the paladin must choose one or the other). A paladin that does not attack may use lay of hands during the Spells segment of the combat round even if the paladin is in the front row of the battle board. A paladin can choose to use both lay of hands at the same time on the same target.

Paladin Class Progress

Paladins can use any armor and any weapon. Paladins have Spiritual Protection, which means that for each point of charisma bonus they gain 1 point of damage reduction per hit received. The damage cannot be reduced to less than 1. All hits do at least 1 point of damage.

Twice per dungeon run a paladin can use a special ability called “lay of hands”. Lay of hands heals any person that the paladin touches. The amount of healing is the paladin's level times the paladin’s charisma bonus. During a combat round, lay of hands can be performed by the paladin instead of attacking (the paladin must choose one or the other). A paladin that does not attack may use lay of hands during the Spells segment of the combat round even if the paladin is in the front row of the battle board. A paladin can choose to use both lay of hands at the same time on the same target.

Paladin Class Progress

Paladins can use any armor and any weapon. Paladins have Spiritual Protection, which means that for each point of charisma bonus they gain 1 point of damage reduction per hit received. The damage cannot be reduced to less than 1. All hits do at least 1 point of damage.

Twice per dungeon run a paladin can use a special ability called “lay of hands”. Lay of hands heals any person that the paladin touches. The amount of healing is the paladin's level times the paladin’s charisma bonus. During a combat round, lay of hands can be performed by the paladin instead of attacking (the paladin must choose one or the other). A paladin that does not attack may use lay of hands during the Spells segment of the combat round even if the paladin is in the front row of the battle board. A paladin can choose to use both lay of hands at the same time on the same target.
